

The PMI Advanced  
**Geo Pore Pro**  
**GPP-1001A**

Not just products...solutions!

## DESCRIPTION

The PMI Geo Pore Pro Porometer is a low pressure instrument designed for the determination of pore size in geotextile fabrics. The robust instrument is easy to use and provides fast and accurate testing results on a variety of geotextile samples. Conforms to standard ASTM D6767

## CAPABILITIES

- Diameter of the most constricted part of a through pore (pore throat)
- Bubble point
- Mean flow pore diameter
- Pore diameter range
- Pore distribution
- Gas permeability

## FEATURES

- Fully automated and computer controlled
- User-friendly, windows-based software: commonly used graphical programming system
- Software allows user to select the speed of pressure increase and the number of pressure steps
- Comes with PC computer with graphical display, accompanying chords & wetting fluid

# SPECIFICATIONS

- Pore Size Range: 5 microns - 500 microns
- Pressure Range: 1 psi
- Pressurizing Gas: Clean, dry, compressed air or nonflammable, noncorrosive gas
- Pressure Transducer Range: 1 psi
- Sample Size: 25mm with one sample holder

# SALES & SERVICES

Our sales team is dedicated to helping our customers find which machine is right for their situation. We also offer custom machines for customers with unique needs. To find out what we can do for you, contact us.

We are committed to customer support including specific service products, short response times & customer specific solutions. To quickly & flexibly meet our customer's requirement, we offer a comprehensive range of services.

Customize your machine  
today!

The most advanced, accurate, easy to use  
and reproducible porometers in the world.
